

The market is too big to read by hand.

Mount Inflection scans the field, ranks the pressure, and turns market noise into structured signal reviews with risk visible. Free Friday is the public proof layer; Premium and Pro add more cadence and operating context.

SCAN THE FIELD

WHAT IT IS

A founder-led market-radar product built around automated scans, ranked signal reviews, visible risk context, and subscriber-ready operating sheets.

RANK PRESSURE

REVIEW RISK

SIGNAL PROCESS

Scan the market. Rank the pressure. Review exits and setups with risk visible before exposure decisions.

FREE FRIDAY

The weekly public trust layer. Readers can watch the radar forward over time instead of accepting a claim.

PREMIUM / PRO

Premium adds Tuesday / Friday context. Pro is the Daily Operator View with ranks, open positions, crypto context, and sizing context.

FOUNDER-LED

Built by an engineer who used the private algorithm for years before taking the signal-review system live.

COMPLIANCE / INQUIRY

Educational only. No auto-trading or personalized advice. Contact: hello@mountinflection.com, mountinflection.com, X, and YouTube.

PUBLIC PROOF LAYER

Proof before promotion.

Use Results and the Free archive as the public trust layer: annual results, drawdowns, growth curve, dated Free issues, and subscriber-facing artifacts.
